

SoGo[®] "1"

ENZYME-ACTIVATED DIGESTER / STAIN REMOVING DETERGENT

SoGo "1", an enzyme-activated digester / stain removing detergent, safely removes a wide variety of protein stains including heat set blood, food and grass, as well as many other body substances you may not want to handle directly. Since customers want their garments back stain free, SoGo "1" can help you earn a spotless reputation.

SoGo "1" is easy to use on the spotting board for localized stains, as a soak for large stains, or in the laundry wheel for bulk stain removal. Its enzymes break down protein stains and its detergents flush them away. Since SoGo "1" is effective at temperatures between 100 and 140° F, it's easy to get good results. And since its powdered enzymes are encapsulated, SoGo "1" shouldn't irritate your nose or throat, and has virtually unlimited shelf life.

SoGo "1" is packed in 1 lb jars, 10 lb pails and 50 lb drums, and is also available in a Phosphate Free formula for use where required. SoGo "1" is a component of the SoGo Reclamation System and of the SoGo Medicinal Stain Removal System.

DIRECTIONS:

Spotting Board Procedure: In a clean spotting bottle, mix 1 teaspoon of SoGo "1" into 4 oz. of warm water (100 – 120°F). Wet stain thoroughly with this solution, wait at least 15 minutes, then flush with wet steam. If residue remains, use QwikGo[®] to finish the job.

Alternative Spotting Board Procedure: Wet stain thoroughly with wet steam or warm water. Apply a dusting of SoGo "1" powder onto wet area and work into solution. Re-wet area, wait at least 15 minutes, then flush with wet steam. If residue remains, use QwikGo[®] to finish the job.

As a Soak: In a clean plastic pail, mix 3 gallons of warm water (100 – 120°F) with 1 ounce of SoGo "1". Submerge stained garment and let soak for 30 minutes, stirring occasionally. Flush thoroughly with warm water or rewash when done.

In a Laundry Wheel: In a **top-loading washer**, mix warm water (100 – 120°F) with approximately 4 ounces of SoGo "1". Run for 5 minutes, then let soak for 30 minutes. Flush thoroughly with warm water or rewash when done. In a **front-loading washer**, mix warm water (100 – 120°F) with approximately 8 ounces of SoGo "1" for every 100 pounds of rated machine capacity. Run for 30 minutes. Flush thoroughly with warm water or rewash when done. **Call us for alternative wash formulas** or see the SoGo Reclamation System Product Overview for linen reclamation instructions.

NOTES:

SoGo "1" is safe for use on whites and color-fast colors and on fabric that can safely be exposed to water and detergent.

Keep SoGo "1" containers closed whenever possible.
